 <p>Google Authenticator Installing... Verified by Play Protect</p> <p>Cancel</p> <p>Open</p> <p>You might also like</p> <p>LINE: Free Calls &amp; Messages 4.2 ★ Microsoft Authenticator 4.5 ★ Google Translate 4.4 ★</p> <p>4.2 ★ 200K reviews   10M+ Downloads   Rated for 3+ Ⓢ</p>	 <p>Google Authenticator Google LLC</p> <p>Uninstall</p> <p>Open</p> <p>You might also like</p> <p>LINE: Free Calls &amp; Messages 4.2 ★ Microsoft Authenticator 4.5 ★ Google Translate 4.4 ★</p> <p>4.2 ★ 200K reviews   10M+ Downloads   Rated for 3+ Ⓢ</p>	 <p>After you turn on 2-Step Verification for your Google Account (or other accounts), you'll need</p> <ul style="list-style-type: none"> <li>Your password</li> <li>A code this app will generate for you</li> </ul> <p>BEGIN</p>

Step7 : Read the descriptions and swipe left to the next page	Step8 : Read the descriptions and swipe left to the next page	Step9 : Read the descriptions and click “DONE”
 <p>Signing in to Google</p> <p>Whenever you sign in to Google, you'll enter your username and password as usual.</p> <p>When you're asked for a code you'll be able to get one from this app.</p> <p>SKIP</p>	 <p>Stay safe &amp; in control</p> <p>When you sign in with a device you trust, you can tell us to stop asking for codes on that device.</p> <p>You'll still be covered because we'll ask for codes when you (or anyone else) tries to sign in to your account from other devices</p> <p>SKIP</p>	 <p>Ready to add account?</p> <p>Remember, you can update your settings any time at <a href="https://g.co/2sv">g.co/2sv</a></p> <ul style="list-style-type: none"> <li>Update your phone numbers</li> <li>Create other backup options</li> <li>Turn off 2-Step Verification</li> </ul> <p>DONE</p>

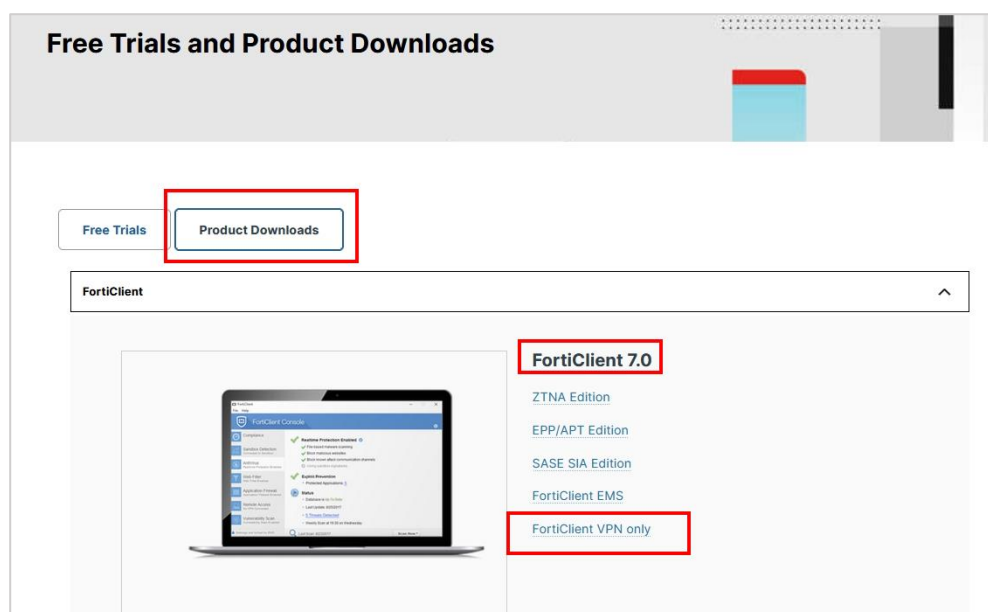

<b>Step10 :</b> Click “Scan a barcode”	<b>Step11 :</b> Click “Allow” to enable the camera functions in the app	
		

## II. Install “FortiClient VPN” on your Mac

A. Open your browser (using Chrome as an example) and input “<https://FortiClient.com/downloads>” in the URL bar. Please download a version compatible with your Mac OS :

Mac OS	FortiClient
10.12	under version 6.2.6
10.13	under version 6.4.1
10.14	under version 6.4.3
10.15	7.0.0 to 6.0.9
11	7.0.0 or 6.4.3

Download version 7.0 as an example, click “FortiClient VPN ”

B. Scroll down the page and click “Download ” to download the file

### FortiClient VPN

The VPN-only version of FortiClient offers SSL VPN and IPsecVPN, but does not include any support. Download the best VPN software for multiple devices.

#### Remote Access

- ✓ SSL VPN with MFA
- ✓ IPsec VPN with MFA

  
Download VPN for Windows  
**DOWNLOAD**

  
Download VPN for MacOS  
**DOWNLOAD**

  
Download VPN for Linux  
**DOWNLOAD .rpm**

  
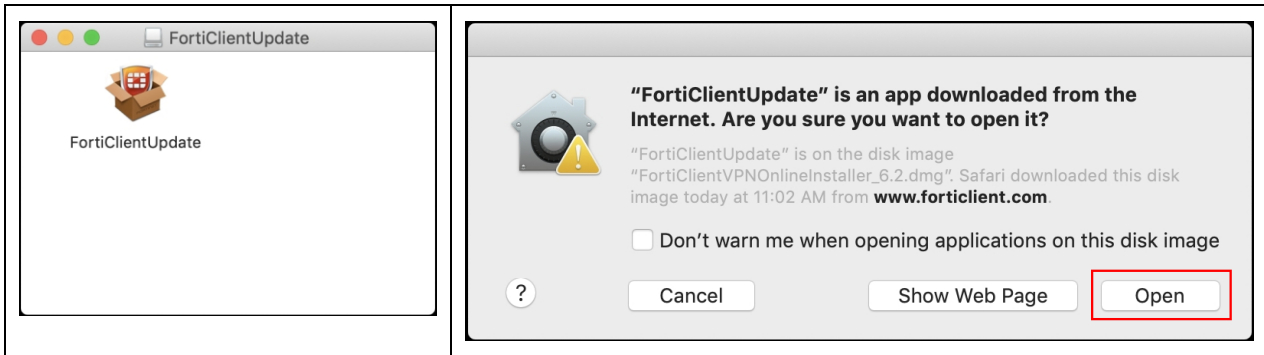

Download VPN for iOS  
**DOWNLOAD**

  
Download VPN for Android  
**DOWNLOAD**

  
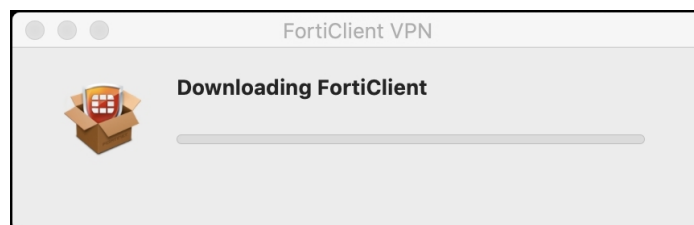

Download VPN for Linux  
**DOWNLOAD .deb**

## C.Install

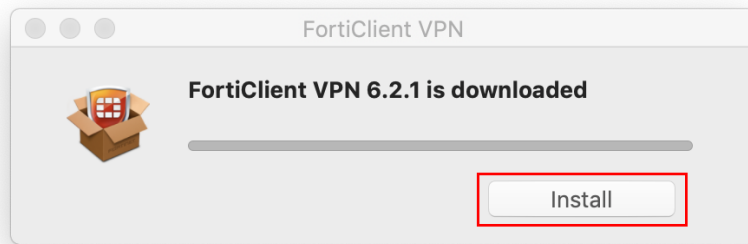

1. After the "FortiClientVPNOnlineInstaller" program is downloaded, please find the program in "Downloads", left click twice, and then click the "Open" button. °

### III. Setup “VPN Activation Service”

A. Please go to “Administrative Service” system of Academia Sinica and click “Individual” , or open page: <https://asbpm.its.sinica.edu.tw>

B. Please click “VPN Activation”

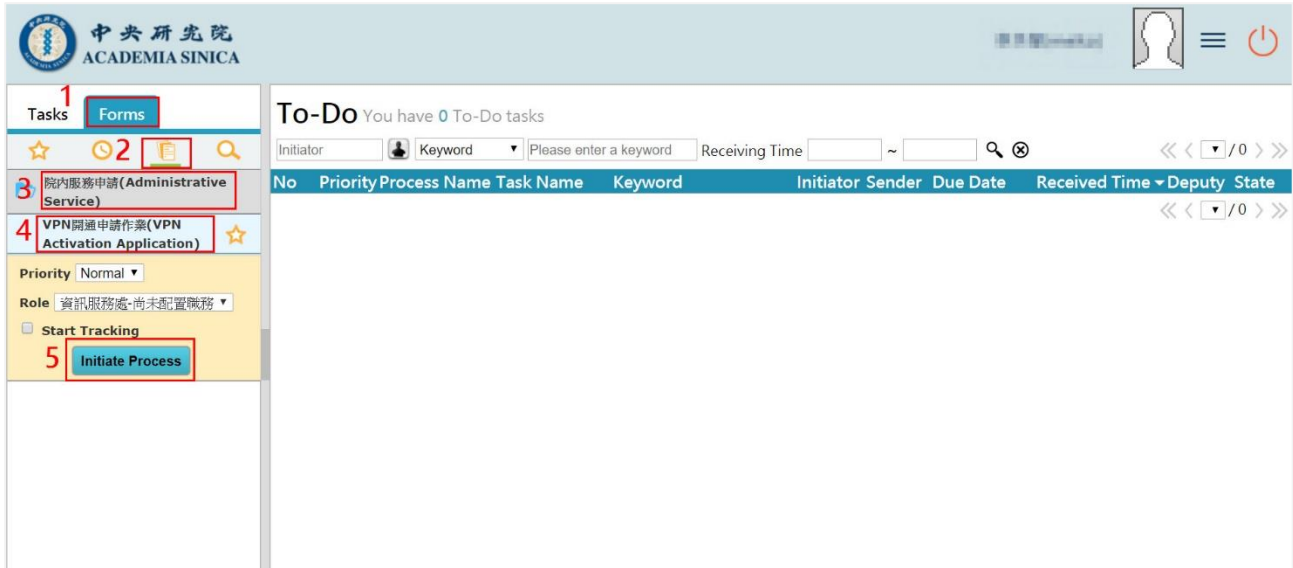

Note that you may need to login the Administrative Service page using your SSO account and password.

Please click “Approve” in the “Sinica BPM System” dialog window

C. After you log in the Sinica BPM System, please proceed the following steps:

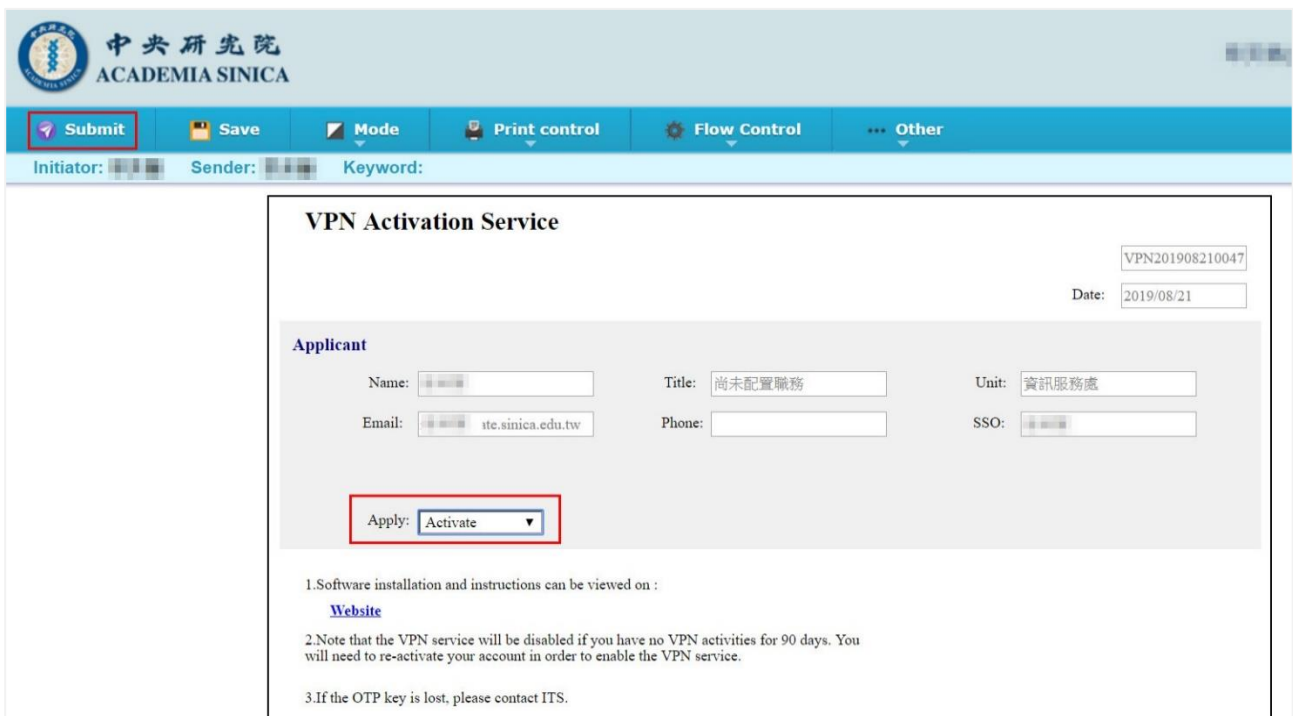

1. click the “Forms” tag
2. Click “ All processes and applications”
3. Click “Administrative Service”
4. Click “VPN Activation Application”
5. Click “Initiate Process” button

The screenshot shows the Sinica BPM System interface. The left sidebar contains a 'Forms' tag (1) and a list of processes. 'All processes and applications' (2) is selected. Under 'Administrative Service', 'VPN Activation Application' (4) is selected. The 'Initiate Process' button (5) is highlighted. The main area displays a 'To-Do' section with a table of tasks.

No	Priority	Process Name	Task Name	Keyword	Initiator	Sender	Due Date	Received Time	Deputy	State
<p>Initiator: <input type="text"/> Keyword: <input type="text"/> Please enter a keyword Receiving Time: <input type="text"/> ~ <input type="text"/></p>										

6. In the application form, select “Activate” in the “Apply” top-down menu
7. Click the “Submit” button on the left-top corner of the window

The screenshot shows the VPN Activation Service form. The 'Submit' button is highlighted with a red box. The form includes fields for Name, Title, Unit, Email, Phone, and SSO. The 'Apply' dropdown menu is set to 'Activate' and is highlighted with a red box. The form also includes a 'Date' field and a 'Website' link.

**VPN Activation Service**

VPN201908210047

Date: 2019/08/21

**Applicant**

Name:  Title: 尚未配置職務 Unit: 資訊服務處

Email: @ste.sinica.edu.tw Phone:  SSO:

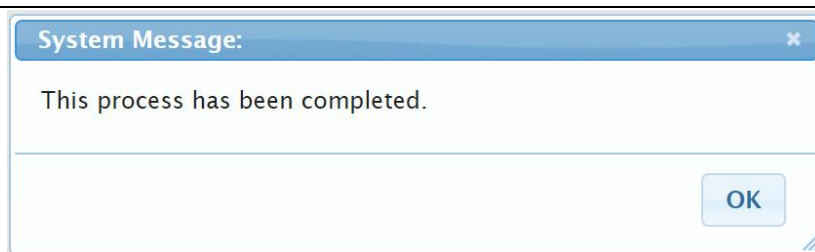

Apply: **Activate**

1. Software installation and instructions can be viewed on : [Website](#)

2. Note that the VPN service will be disabled if you have no VPN activities for 90 days. You will need to re-activate your account in order to enable the VPN service.

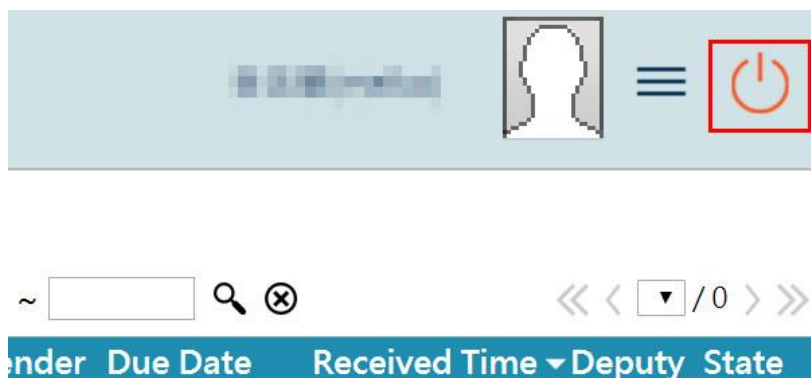

3. If the OTP key is lost, please contact ITS.

After submission, there will be a pop-up dialog showing you have completed the application. Please click “OK” button.

Note : that the VPN service will be disabled if you have no VPN activities for 90 days. You will need to re-activate your account in order to enable the VPN service.

8. Please click the  icon to log out Sinica BPM System.

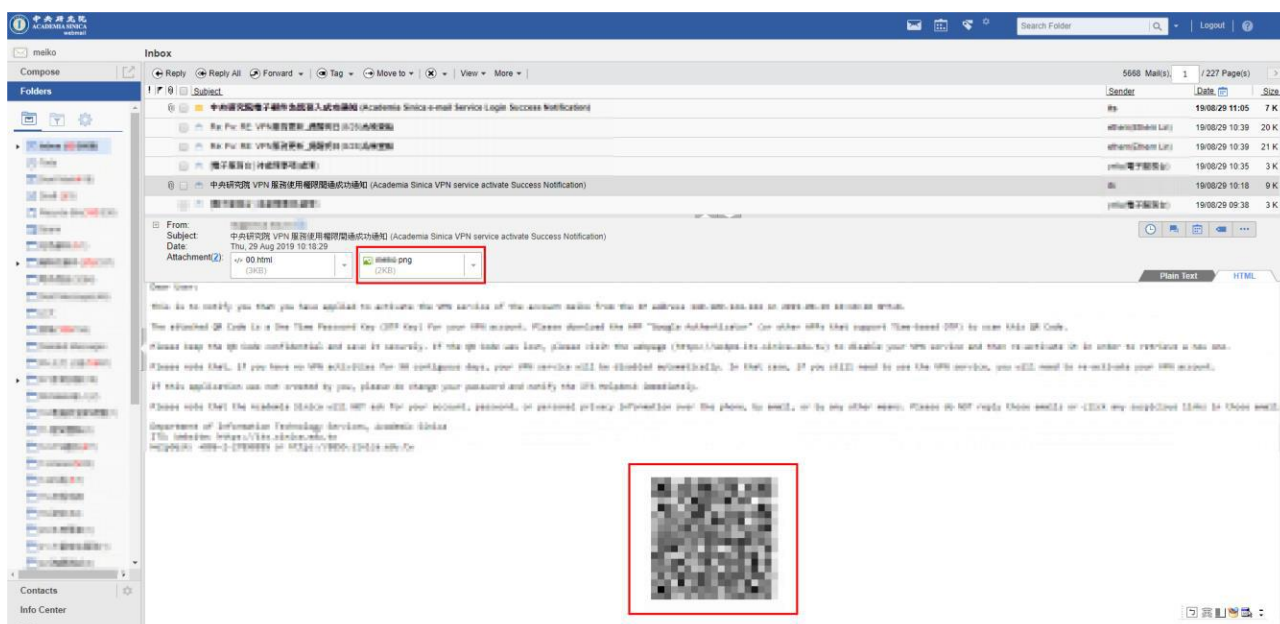

#### IV. Check your notification email

A. Please log in your Gate email account and find the email entitled “中央研究院 VPN 服務使用權限開通成功通知 (Academia Sinica VPN service activate Success Notification)”

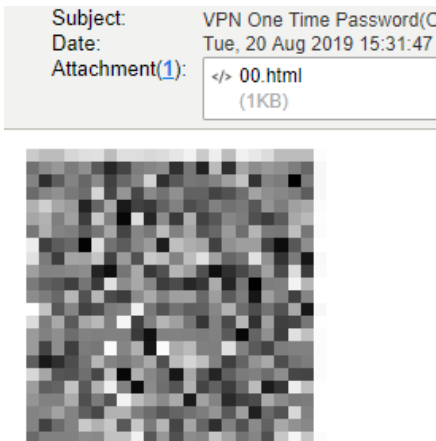

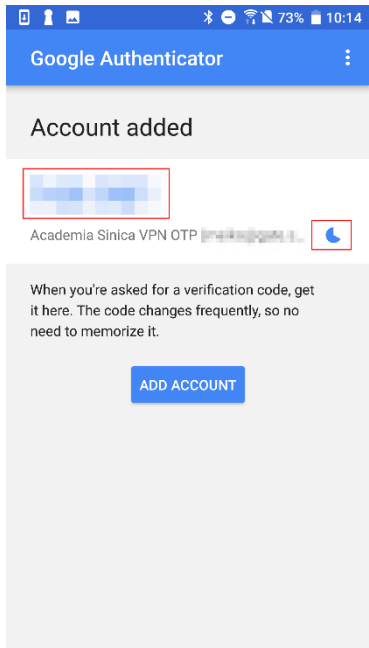

B. Please open the email, switch to “HTML” mode”, and click “Unblock, display external images inside this mail. Display images from its by default”

C. You will find the QR code at the attachment or at the bottom of the mail

D. Please use the “Google Authenticator” app, which you have installed in the first step, to scan

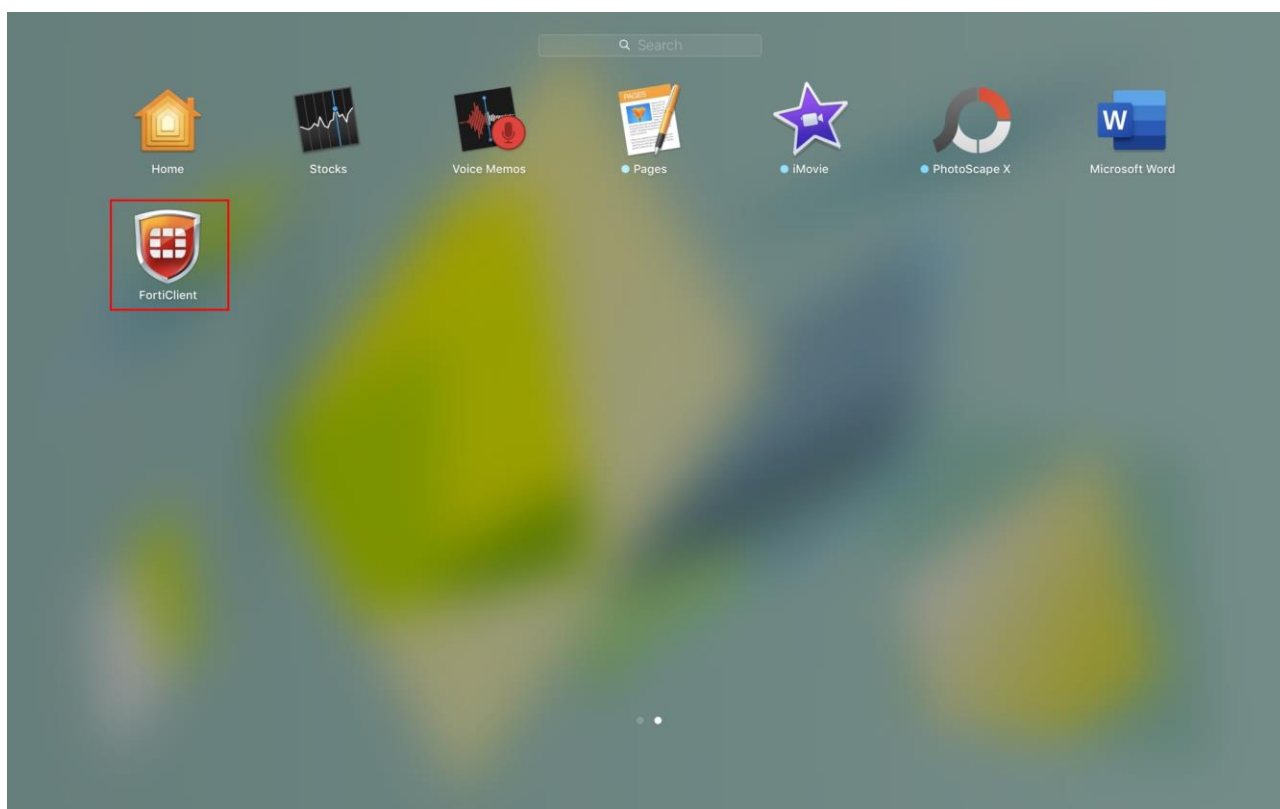

the QR code in the email

Use the “Google Authenticator” app to scan the QRCode in the email	The app will show a dynamic password that refreshes every 30 seconds.
	

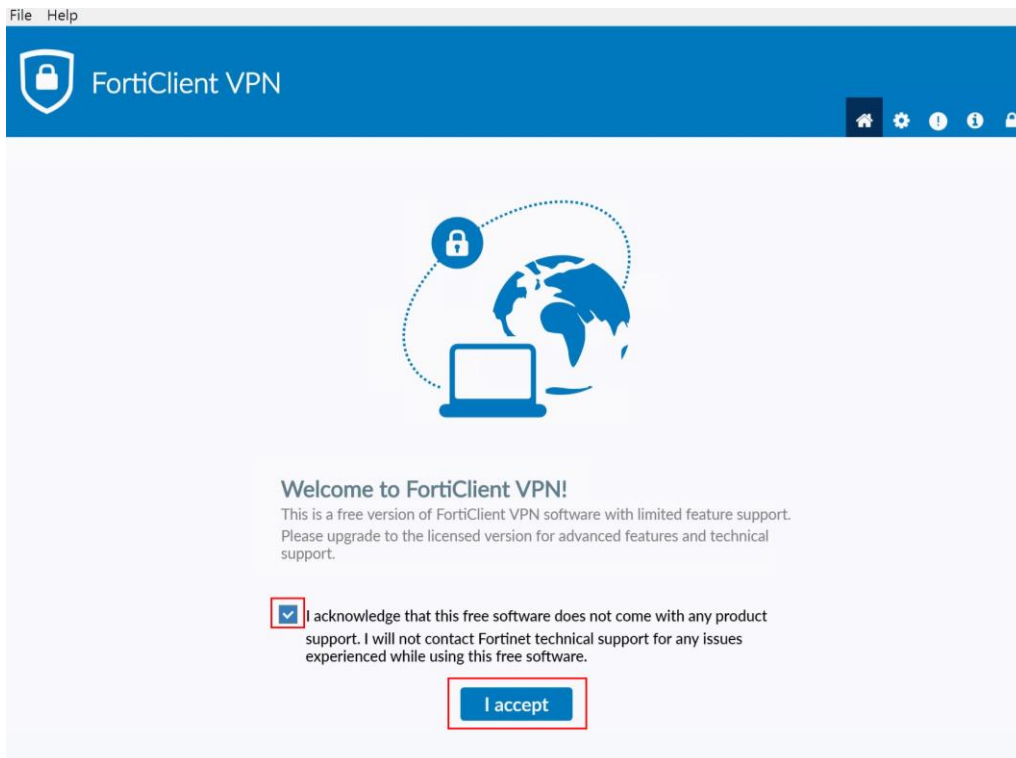

## **V.Enjoy VPN Service**

A.Open the “FortiClient VPN” program that you have installed the Step 2

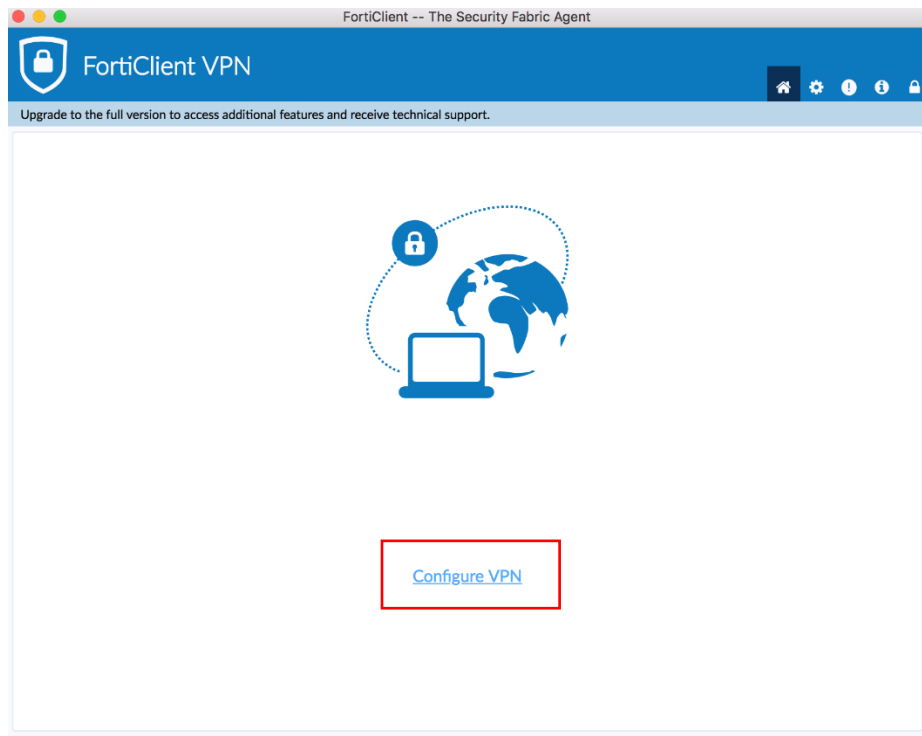

1.Find the FortiClient VPN program in all programs and click 「」。

B. Click “I acknowledge...” and then “I accept” when you first time use the “FortiClient VPN” application

C. Click “Configure VPN” button

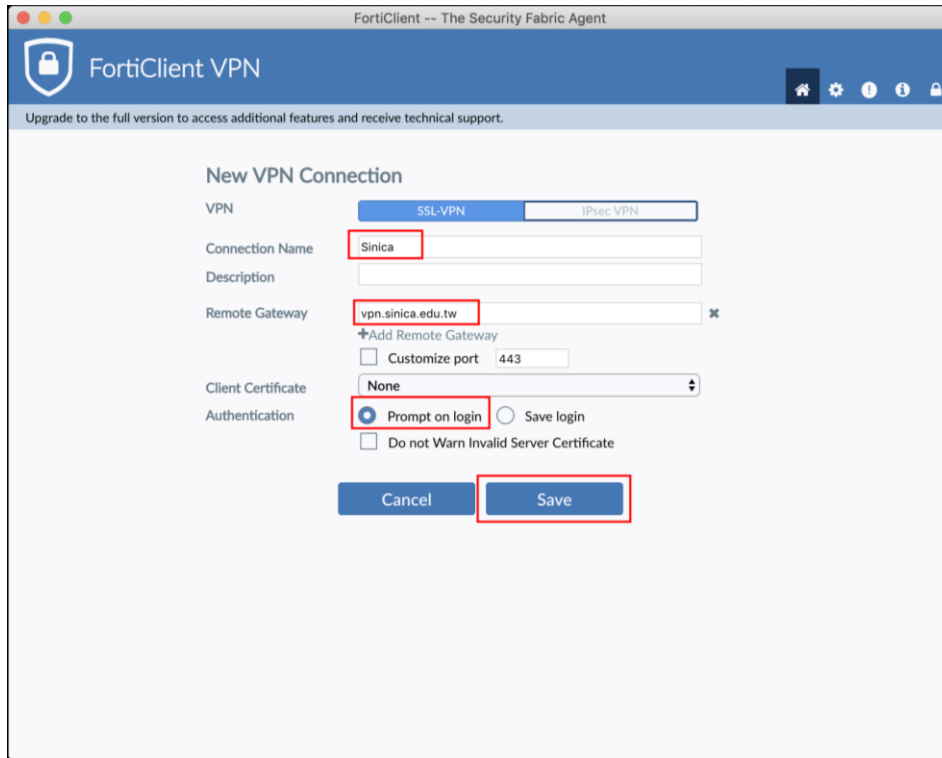

D. Please follow the instructions to configure the VPN settings

1. Connection Name (required): Please give a name for the VPN connection
2. Description (optional): Please give some descriptions to this connection
3. Remote Gateway(required): Please input **vpn.sinica.edu.tw**
4. Customize port (do not change) : please keep the default value 443

5.Authentication: please keep the default value “Prompt on login”

6.Other settings, please keep the default value

7.Please click the “Save” button

E.In the following log-in page, please follow the instructions to input:

1.VPN Name: please select the connection name that you input in the previous step

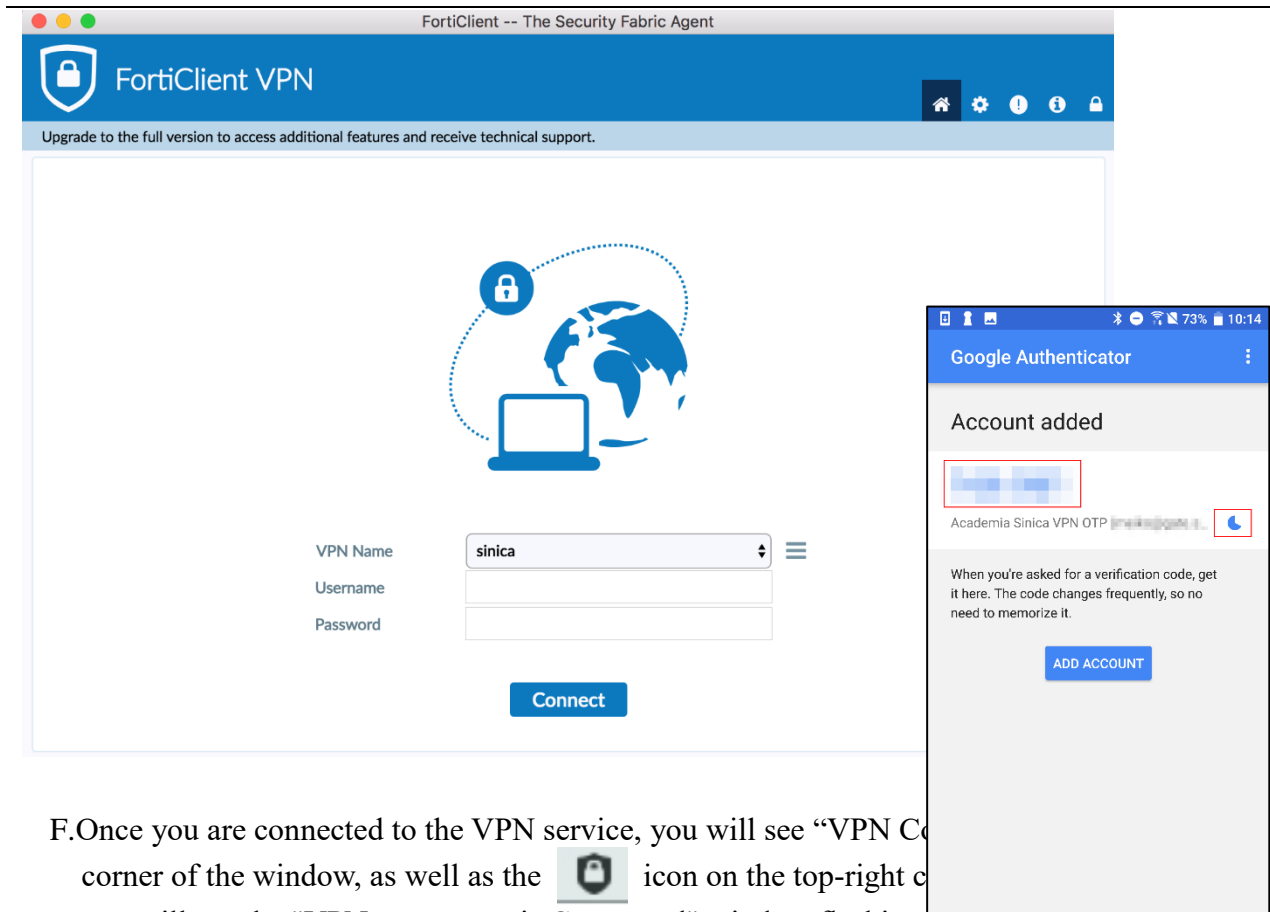

2.Username: Please enter your "Gate e-mail account" (eg. abc@gate.sinica.edu.tw or abc@sinica.edu.tw)

3.Password: Please enter the password for your Gate e-mail account, following by the 6-digit number shown in your "Google Authenticator" APP. For instance, if your Gate e-mail account password is XXXXXX and the 6-digit number on the APP is 000000, you should input XXXXXX000000 here.

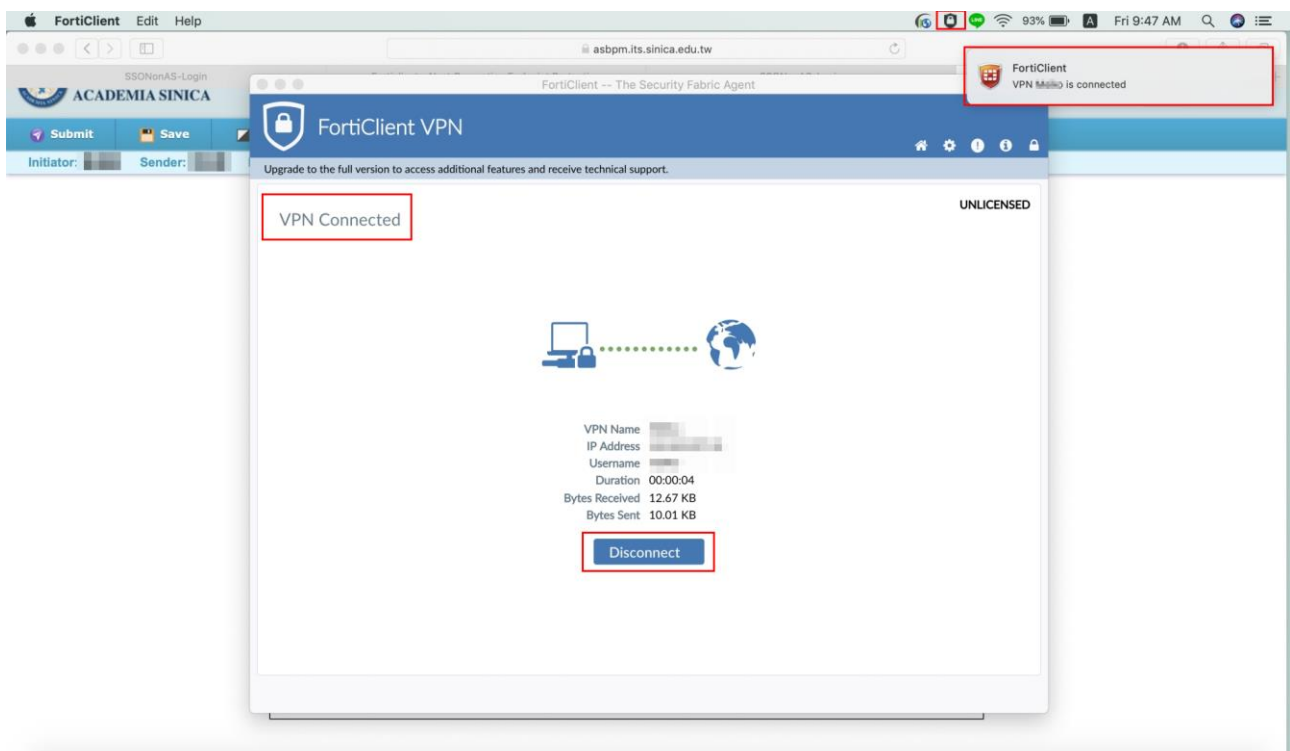

4.Finally, please click the “Connect” button.

Note that, the 6-digit number is valid for 30 seconds only. After that, the APP will refresh the number, and you will have to use the new version 6-digit number to form your new password.

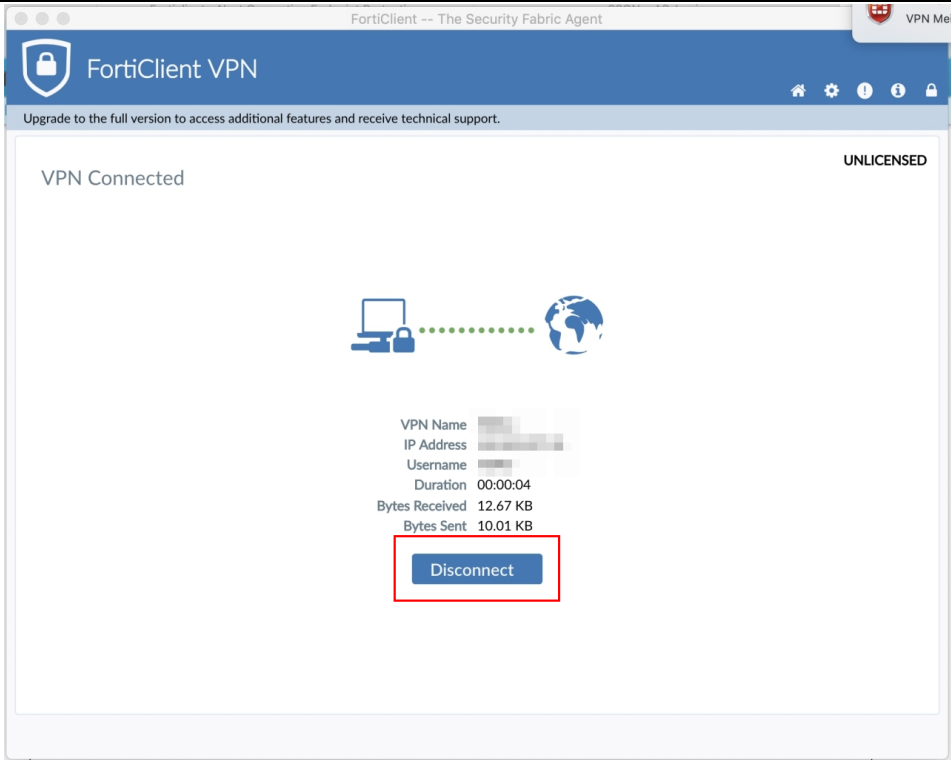

F. Once you are connected to the VPN service, you will see “VPN Connected” in the top-left corner of the window, as well as the  icon on the top-right corner. When you are connected, you will see the "VPN your name is Connected" window flashing past.

G. You can click “Disconnect” to disconnect this VPN service too.
